

## DCL and university education -- Can the geoscience be saved from the crisis of extermination? ---

# Satoshi Sakai[1], GFD Dennou Club Hayashi Yoshi-Yuki

[1] Earth Sci. IHS, Kyoto Univ

The dependancy to the computer was not able to be improved rapidly, and talk about the geoscience to the calculation pulling out in 1980's.

To correspond to this situation, the Dennou club has done the activities of the development of DCL and the spread, etc. such as universities regularly as no organization with the volunteer base.

However, not only knowledge concerning the computer but also the education system of necessary basic knowledge for the geoscience has collapsed because of the influence of this reforms in university education etc. of ten years.

It is necessary to think about this influence from the ideal way of a university which is especially serious in the geoscience, fundamental.
